Embarcadero All-Access
On-demand, Heterogeneous Tool Chest

embarcadero®

Embarcadero® All-Access™ provides all of the application development and database tools you need – when you need them. It's the industry's first on-demand, heterogeneous tool chest for application developers and database professionals. All-Access includes all Embarcadero's tools in one flexible, cost-effective license.

## Industry's Most Comprehensive Heterogeneous Tool Chest

In today's constantly changing business and technology environment, optimizing your tooling to match your organization's profile can be difficult. The traditional approach is to go out and buy new tools whenever you need them. This can be time-consuming and expensive, analogous to driving to the hardware store whenever you need a new tool. With All-Access, we simplify it for you. You get instant access to the industry's best tools when and as you need them, in a role-flexible offering.

Low Total Cost of Ownership. Off-The-Charts Value

Good software tooling can greatly help to improve user productivity and systems reliability. However, for most organizations, the costs of managing licenses and vendors add up. Staying up to date with all of the latest versions of software can be a great expense, often requiring a complex and time-consuming deployment process. This all adds up to a tremendous opportunity for savings. All-Access gives you improved asset reuse, visibility into your licenses, plus budget predictability, with best-of-breed tooling from a single vendor. One license serves a variety of roles and functions.

Easy License Management and On-Demand Deployment

License and vendor management can be a monumental challenge, especially in the face of reorganizations, technology changes, and project resource re-allocation. Embarcadero All-Access is a single, easy-to-manage asset, which places a robust and role-flexible collection of products at your disposal. This greatly simplifies the effort associated with managing a large collection of a-la-carte products. Included in All-Access are technologies designed to ease the deployment and management of your software assets.

Embarcadero All-Access offers comprehensive support for the most commonly used frameworks, databases, languages, and technologies, giving you the most versatile tool chest on the planet.
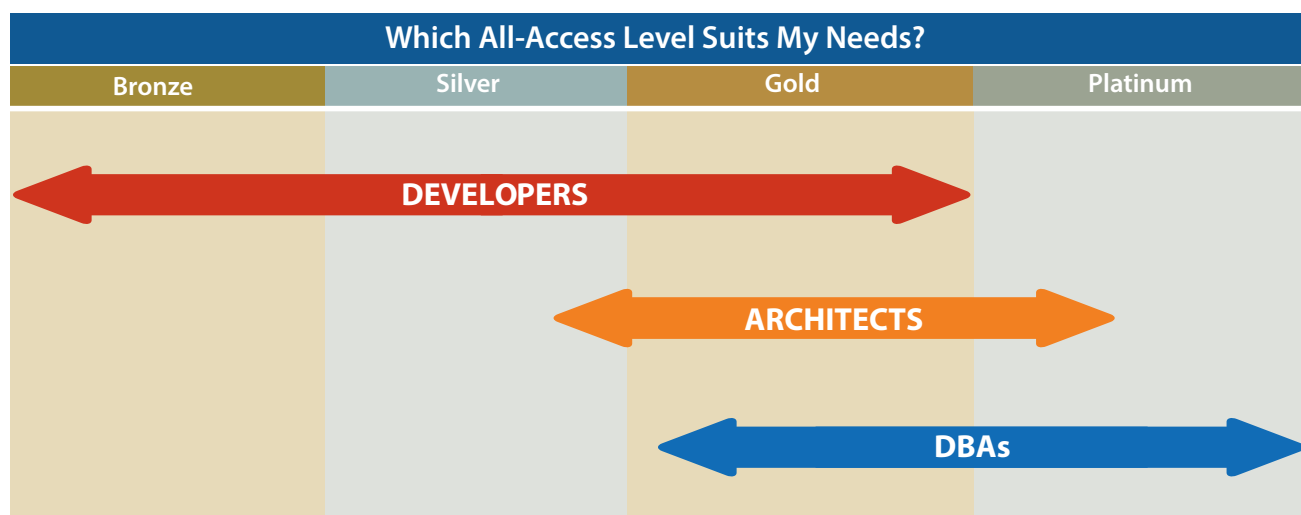

All-Access features:

• The industry's only comprehensive heterogeneous tool chest for developers, architects, and DBAs.

• Perpetual licenses for the products your team relies upon.

• Access to any new product releases that may be introduced into your membership level.

• Annual membership that includes support and maintenance to ensure your products are always up-to-date.

All-Access benefits:

• Lowers your TCO for developer, architect and DBA tooling.

• Provides all that you need to deliver apps, manage users and groups, and streamline licensing within your organization.

• Provides the broadest multiplatform coverage available across the languages, frameworks, databases, and technologies your team needs to run your information systems.

Embarcadero All-Access Levels

	Bronze	Silver	Gold	Platinum
Application Development	Delphi® Professional	Delphi® Enterprise	Delphi® Architect	Delphi® Architect
