# InterBase XE3
Multi-device Embeddable Database

embarcadero®

Embarcadero® InterBase® XE3 is a full-featured, high performance, encryptable, multiplatform and scalable relational database for developers who are looking to embed a low-cost, zero admin, lightweight secure database into their Android, iOS, Windows, OS X and Linux apps. With InterBase XE3 you get powerful access control, disaster recovery and journaling, as well as support for popular database drivers for increased deployment flexibility.

Small, Fast, Highly Efficient

Need a database that is compact in memory and disk size but powerful enough to securely support your business-critical apps? InterBase is easy to embed or install, has a tiny footprint, supports powerful encryption and requires zero administration. It's an incredible database to embed in your apps.

Embeddable Database for Android and iOS

Seamlessly support local app data across platforms with InterBase ToGo, an embeddable database for your mobile and desktop apps. InterBase ToGo runs inside your apps with no separate database server process required. It's fast with a small footprint, just like InterBase server, but it's optimized for mobile.

Ultra-Fast Performance

Build your app using one of the fastest native databases available. InterBase leverages today's multi-core CPUs and multi-CPU systems, along with a unique versioning approach, to retrieve and update your data fast.

Speed Up to Lower Risk Development

Get to market faster and reduce your testing overhead by using InterBase's built-in user data visibility capabilities. Develop once and you're good to go on all supported platforms! This approach makes data transport safer, reduces app testing and reduces risk of errors in data protection policies.

Use the Cloud or Keep it Local

Give your app instant access to resources by hosting InterBase in the cloud. Or keep it local for higher security and faster performance. You choose.

InterBase Connects With...

New! Introducing IBLite

Based on InterBase ToGo, IBLite is run-time royalty free and powered by the same small footprint engine. With no installer required, IBLite is as simple to deploy as including the required files with your application, providing the core power of InterBase's easy to use, multi-platform embeddable database engine for Free! Yes! Free! - IBLite also uses the same on disk structure for data storage, making transportable multi-platform data storage across Windows, Mac OS X, Android and iOS a reality, greatly

simplifying and reducing the cost of development and product life cycles!

IBLite is now available exclusively in RAD Studio XE7 (all editions) and Delphi XE7 (Pro with Mobile and above). Do you have more demanding mobile data requirements? Upgrade from IBLite to InterBase ToGo edition for additional functionality including encryption, multi-core support and larger database file sizes.

Comparing IBLite, InterBase ToGo, and InterBase Server Edition

Attribute Description	IBLite	InterBase ToGo	InterBase Server Edition
Licensing of CPU cores	1	4	8
Licensed simultaneous users	1	2	Unlimited
Number of connections per user	1	4	4
Remote client access	Yes	Yes	Yes
TCP listening server	No	No	Yes
Strong (AES) database and column encryption	No encryption (weak or strong)	Yes	Yes
Strong network (SSL) encryption	No encryption (weak or strong)	Yes	Yes
Able to import add-on licenses	No	No	Yes
Database file size limitation	100MB	No limit	No limit
Simultaneous transaction per connection	1	No limit	No limit
Services API enabled	No	Yes	Yes
OTW/SSL Support	No	Yes	Yes

InterBase® XE3 Supported Platforms

- **XE3 Server:** Windows, Linux
- **XE3 Desktop:** Windows
- **XE3 ToGo:** Android, iOS, Windows, Mac OS X
- **XE3 IBlite:** Android, iOS, Windows, Mac OS X
- **XE Server (previous version, sold separately):** Mac OS X, Solaris

InterBase XE3 64 bit is supported on:
- Windows 8, Windows 7, Windows Server 2012, and Windows Server 2008

InterBase XE3 32 bit is supported on:
- Windows 8, Windows 7, Windows Vista, Windows Server 2012, Windows Server 2008, and Windows XP SP3
- Mac OS X Snow Leopard, Mac OS X Lion and Mountain Lion (ToGo only)
- Linux: Red Hat Enterprise Linux 5.10 and 6, SUSE Enterprise Linux 11

InterBase XE3 mobile is supported on:
- iOS versions 5.1 and later
- Android versions 2.3 to 4.2.x on an ARMv7 processor
